YEARS

serving the real estate
community

100+

AWARDS

firm, practice group and
individual awards for excellence

Cox Castle attorneys are recognized experts in the field of renewable energy development.

We represent sophisticated and cutting-edge developers, lenders, and tax equity investors in this fast-paced and growing industry.

Featured Projects

Represented Intersect Power in approval of the Darden Solar and Storage Project, a 2.3 GW project in Fresno County, CA. One of the world's largest solar and storage projects and the first renewable energy project to be approved by the California Energy Commission under AB 205.

Obtained approval of 300 MW battery storage project on behalf of Hecate Grid in unincorporated Los Angeles County near the community of Acton.

Lead entitlement and real estate counsel on the Fountain Wind Project, which proposes to provide 205MW of clean power to the California grid. Fountain Wind is the first non-thermal renewable project to utilize CA state-level review under the landmark CA AB 205 "opt-in" legislation.
