Overview

Clark Morrison has 30 years of experience in the permitting and development of large and complex development projects. His clients include residential and commercial developers, renewable energy developers, public agencies (universities, water districts, airports, cities, and counties), mining companies, and wineries and other agricultural concerns. Clark's areas of experience include all State and Federal laws affecting the development of real property. He is recognized nationally for his concentration in federal endangered species, wetlands, water law, public lands, and other natural resource laws, and works on the largest habitat conservation planning efforts in the western United States.

Clark is co-author of *Natural Resource Regulation in California*, the State's leading treatise on natural resource law and agency permitting. Clark speaks and writes regularly on land use and natural resource matters, and has served as adjunct lecturer on these subjects at the U.C. Berkeley School of Law. In 2017, he was named "Natural Resource Lawyer of the Year (San Francisco)" by the nationally-respected publication, *Best Lawyers*, and he is regularly recognized by that publication for his work in the areas of land use, natural resources and real estate law.

Land Use and Development

Clark's statewide land use practice is focused on the entitlement, defense, and development of mixed-use master-planned communities. He advises many of the largest developments in California, including several projects with proposed build-outs of

between 10,000 and 25,000 dwelling units. He was a pioneer in the evolution of California's laws requiring evaluation of water supply resources in connection with new development. Clark is skilled in all aspects of land development, from the preparation of specific plans and environmental impact reports and the negotiation of development agreements, to the defense and settlement of complicated multi-party CEQA lawsuits, and ultimately to the implementation of fully permitted projects through the finance, mapping, and construction processes.

Wetlands and Endangered Species

Clark is one of the nation's leading attorneys in wetlands and endangered species regulation. He advises a broad spectrum of clients in this area, including land developers; alternative energy companies; mining and agricultural interests; and public agencies such as water districts, cities, and counties; and mining and agricultural interests. Clark helps his clients negotiate the approval processes of the U.S. Army Corps of Engineers, the U.S. Fish and Wildlife Service, the California Department of Fish and Game, U.S. Environmental Protection Agency and California's Regional Water Quality Control Boards. His experience includes permitting and litigation under Sections 401 and 404 of the Clean Water Act, Sections 7 and 10 of the Endangered Species Act, the Migratory Bird Treaty Act, the Marine Mammal Protection Act, and Sections 2081 and 1602 of the California Fish and Game Code. He has participated in the development of numerous large-scale habitat conservation plans, natural community conservation plans, and mitigation banks. He is presently handling some of California's most complex wetlands and endangered species matters. As a result of this work, Clark is a recognized authority on the National Environmental Policy Act (NEPA), having managed the preparation of numerous environmental impact statements and other NEPA documents.

California Water

Clark is the firm's primary resource on water rights and related issues. He regularly advises water districts, cities, counties, other public agencies, developers, industrial concerns, and agricultural interests in all aspects of water law. His matters include water rights permitting, water transfers, conjunctive use arrangements, wastewater treatment

Education

Berkeley, 1984

and reuse, urban water management planning, water supply/demand evaluations under SB 610 and SB 221, infrastructure development and finance, and all other matters associated with the development, use, management, and transfer of water resources. He is also experienced in handling the myriad state and federal regulatory structures affecting the use of water, including the state and federal Endangered Species Acts, Magnussen-Stevens, the Clean Water Act, the Porter-Cologne Act, and other laws.

Experience

Defeated a challenge to plan approvals challenging compliance with State Density Bonus laws on behalf of master developers.

Advised a developer in response to litigation challenging adequacy of water supply assessment.

Assisted landowners in securing entitlements for a 1.5 million square foot retail project in the City of Livermore. Obtained trial court victory in CEQA, Williamson Act, and Community Facilities District litigation filed against the project by neighboring commercial landowners.

Defeated CEQA and Water Supply Assessment Law action challenging mixed-use development project.

Defeated challenge on behalf of master developers to plan approvals challenging compliance with State Density Bonus laws.

Obtained favorable trial court ruling for client defending CEQA challenge by competing business owners.

Represented a developer in the development of a 140,000 square foot commercial center, including CEQA litigation.

Represented a developer of a water-oriented master-planned community consisting of 11,000 homes, several million square foot employment center, and golf courses, eco-restoration, and other recreational amenities on an approximately 5,000 acre tract in the San Joaquin Delta. Representation included environmental review securing land use entitlement, and defending the project, including earlier proposals, from multiple CEQA compliance lawsuits.

Represented developers in the development of a 1,000-home golf course community in the City of Vacaville, including environmental review and securing project entitlements as well as defending the project against a referendum effort and litigation from several opponents.

Represented an engineering firm in multimillion dollar claims arising out of construction of a cap on a former landfill site together with a new municipal golf course. Case involved novel issues of dredge spoils reuse and settled following partial summary judgment victory.

Represented a county in defense of multi-party CEQA action alleging inadequate water supply analysis.

Represented a group of developers with projects in Rancho Cordova against challenge of federal approvals on NEPA, Endangered Species Act, and Clean Water Act grounds.

Represented homebuilders with residential projects in the Sunrise Douglas Community Plan Area in the City of Rancho Cordova in connection with challenges brought under NEPA, the federal Endangered Species Act, and the

Clean Water Act.

Represented the a city in both state and federal court in connection with challenges brought by environmental groups under CEQA, NEPA, and the California and federal Endangered Species Acts.

Represented the University of California in the state and federal natural resource permitting for the 10th UC campus to be located on vernal pool grassland habitat in Eastern Merced County.
