Avoiding Gaps in Wrap Insurance Coverage for Construction Projects

8.6.19 | Webinar

Jeffrey Masters will be speaking at a Strafford Live CLE webinar entitled "Avoiding Gaps in Wrap Insurance Coverage for Construction Projects". With construction booming, contractors and developers are turning to project-specific wrap-up insurance programs to insure such projects and to rolling (multi-project) wrap-ups. There is no standard wrap policy form, and there frequently is little case law guidance on the workings and interpretations of these programs different from the law applying to the constituent parts of the program. Savvy counsel must recognize innovative options and potential issues at the outset. The panel will review these and other key issues.

This webinar will take place on August 6, 2019.
