Health Deals Get a Booster Shot

2.22.12 | News
Daily Journal

David Lari was quoted in a February 22, 2012 article about how hospital real estate transactions have started to rebound despite a depressed economy yet have become increasingly complex. As health care industry mergers and acquisitions have grown, so has the array of medical regulations, making deals more challenging.

Lari said he structures transactions “with protections as broad as possible.”

“There’s a lot of anxiety in making sure the health care facility is being operated properly and in full compliance with existing laws,” Lari added. “The reality is that it is often difficult to predict what the impacts of new health care and other regulations will be. However, through strategic risk management analysis and careful legal drafting, we work with our clients to help protect their short-and long-term investments.”
